

C YASHWANTH

ML Engineer | AI Full Stack Developer

yashwanth02092006@gmail.com • 9677191681 • LinkedIn • GitHub

PROFILE

AI/ML-focused developer building intelligent full-stack applications across RAG, backend systems, and LLM-powered products. Experienced with Python, FastAPI, modern frontend frameworks, databases, vector search, and AI application pipelines.

EDUCATION

B.Tech. Artificial Intelligence and Machine Learning

2024 – Present

Rajalakshmi Engineering College, Chennai

TECHNICAL SKILLS

Programming	Python, C, JavaScript, TypeScript
AI / ML	PyTorch, Scikit-learn, Sentence Transformers, FAISS, RAG, LLMs
Backend	FastAPI, REST APIs, PostgreSQL, SQL, JWT
Frontend	React, Next.js, Vite, HTML, CSS, Tailwind CSS
Tools	Git, GitHub, Hugging Face, Groq, Ollama, Supabase

INTERNSHIP EXPERIENCE

AI Full Stack Developer Intern — Xmedia

Internship

- Contributed to AI-powered full-stack application development as an AI Full Stack Developer.
- Worked across frontend, backend, database, and AI/LLM technologies to build and integrate application features.

PROJECTS

RAG Tech Bot

FastAPI · FAISS · Sentence Transformers · Groq · React/Vite · Three.js

- Built a modular RAG chatbot with vector retrieval, query expansion, reranking, context boosting, and LLM response generation.
- Designed independent retrieval, reranking, context, and generation components for easier testing and extension.

Gym Management & AI Fitness

FastAPI · PostgreSQL · Jinja · JWT · Ollama

Website

- Developed a full-stack gym platform with user, trainer, and admin workflows for memberships, bookings, attendance, workouts, nutrition, and progress tracking.
- Designed backend services and database models for authentication, subscriptions, trainer slots, workout plans, diet plans, logs, payments, and notifications.

AutoTrack

Full-Stack Web Application · Database · REST APIs

- Developed a vehicle-management platform for centralized vehicle records and operational workflows.
- Implemented structured data management and automated workflows to streamline vehicle administration.

AI Code Sage

Python · AI / LLM · Code Analysis

- Built an AI-assisted developer tool that analyzes source code and turns detected issues into actionable explanations and suggestions.
- Designed an LLM-assisted workflow for code understanding, debugging support, and code-quality feedback.
