

Thavaneshwaran S

Chennai, India

dthavan628@gmail.com — github.com/thavansys — thavaneshwaran.org

Profile

AI and Machine Learning student building practical AI systems using Python. Focused on Retrieval-Augmented Generation (RAG), multilingual AI chatbots, and LLM-powered developer tools.

Experienced in designing document embedding pipelines, vector search systems, and integrating large language models into real-world applications.

Skills

Programming: Python, TypeScript, JavaScript

AI / ML: Machine Learning, Retrieval-Augmented Generation (RAG), Prompt Engineering, LLM Workflows

Tools: Git, GitHub, Linux (Ubuntu), Ollama, Hugging Face

Frameworks: React, Vite

Databases: ChromaDB, Supabase, Vector Databases

Projects

RAGCore

- Developed modular Retrieval-Augmented Generation system supporting multiple LLM providers
- Implemented document embedding pipelines and semantic vector search
- Built React + Vite interface for interactive AI responses
- Integrated vector database retrieval for contextual responses

Multilingual RAG Chatbot

- Built multilingual chatbot using Ollama with Llama 3.1 models
- Implemented document retrieval pipeline using ChromaDB
- Added support for multilingual queries including Indian languages

Real-Time RAG System

- Designed low-latency document retrieval pipeline
- Optimized embedding workflows for faster AI responses

CoBrain CLI

- Built command-line AI assistant for code generation and debugging
- Integrated Ollama and Gemini models for developer productivity

Education

Rajalakshmi Engineering College

Bachelor's Degree Student

Focus: Artificial Intelligence and Machine Learning

GitHub Activity

- 170+ contributions on GitHub in the last year
- Active development of AI and Generative AI projects
- Regular experimentation with RAG pipelines and LLM tools
